

# WHAT'S CONTROLLING YOUR PLANT?

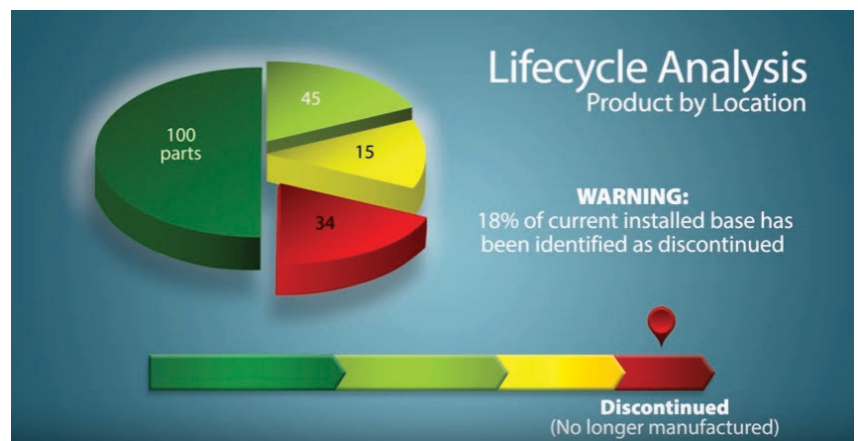

88% of plants use automation systems beyond the manufacturer's obsolescence date.

MITIGATE & ELIMINATE RISK

## 50% of downtime...

Half of all unplanned downtime results from aging equipment.

As a manufacturer today you are challenged to leverage your automation investment to keep plant assets running efficiently. Critical equipment failures and lack of adequate spares impacts your ability to keep assets optimized. Aging equipment often does not provide the visibility or reliability you need. A Horizon

Automation Lifecycle Analysis provides you with the actionable information you need to make informed decisions about your lifecycle investments.

### Do you know the lifecycle status of your production equipment?

Don't wait until it is too late! Talk to your Horizon Solutions Account Manager today to schedule an Automation Lifecycle Analysis, call (800) 724-4750.
