ENGLISH EFFICIENCY
Doing more while lowering costs and emissions.

Energy Expenses
33% vs 60%

A comprehensive energy strategy drives up your bottom line and drives down energy costs. Saving energy isn’t just a green strategy, it’s a growth strategy.

Drive up the bottom line by
- Reducing the impact of rate increases
- Creating more freedom for your cash flow
- Leveraging incentives to reduce the cost of replacing key equipment
- Increasing employee productivity
- Reducing workplace accidents

Drive down energy costs by
- Reducing energy use
- Reducing utility costs
- Reducing maintenance time and costs
- Establishing energy efficient practices

Are you approaching energy as merely a cost to be managed?
You could be overlooking enormous opportunities to:
- Reduce energy, waste, and maintenance
- Improve quality, safety, and productivity
- Create new business value

HorizonSolutions.com
Protect the environment and boost your bottom line

Providing more than just products
The energy division of Horizon Solutions™ is a design-build energy solutions provider that has the ability to secure the maximum incentives available to meet your sustainability goals and targeted return on investment.

From the latest in LED lighting and controls to super-efficient VFDs to drive your pumps and motors, we have the suppliers, products, and services it takes to save energy and reduce your costs. We are able to secure maximum dollars in incentives and rebates through our trade ally and program management relationships with utility and government organizations across our footprint, making sure your return on investment is met.

From audit to installation
Our electricians and qualified subs contractors get it built, providing a turn-key solution from audit to installation. Our engineers, auditors, and project managers identify the measures, design the solutions, and pre-qualify the incentives. We make it all happen with our own electricians and qualified subs or your own preferred contractors. We even do all the paperwork for you. And it’s all for one price, designed to meet your ROI.
We do it all. While lighting often leads the retrofit list, Horizon Solutions offers a whole lot more. With a specialization in mechanical and HVAC energy measures, we are able to access your whole building, including pumps and blowers, boiler replacements, fuel-source conversions, chillers, energy management systems, and rooftop units. Indoor or out, electric or gas, it can all be in our sights when we audit your facility.

We do what we do well, and we do it for multiple verticals—from industrial facilities to warehouses, commercial enterprises large and small, municipal facilities from city hall to the firehouse, and educational institutions from elementary schools to Ivy League campuses. Horizon Solutions speaks your language and can translate your financial and sustainability goals into successful projects.

Horizon Solutions has helped thousands of customers save over 11,000,000 kilowatt-hours per year in electric energy and over 300,000 therms in gas.

“After receiving two months of electricity invoices, we have seen a savings of $1,496 our first month and $1,358 the second month. These numbers are even higher than the projected savings of $1,101 that was stated in your analysis. Thank you for all of your help and effort on this lighting project, it was a great success!”

— Frozen, Refrigerated & Dry Storage Company
President & Chief Operating Officer

“Everyone is very happy with the lighting and it makes the facility look better. The machine operators were skeptical in the beginning with the VFDs being put on the welding stations but they are very happy and surprised at how well they work. We’re also expected to save significantly on our natural gas next winter, something that has us very excited.”

— Jason Stokes, Maintenance Supervisor, Lytron Inc.

Comprehensive Approach

Lighting & Energy Services
- Preliminary Building Facility Audits & Findings
- Lighting Audits
- Design of Lighting System Upgrades
- Present Potential Energy Savings
- Cost Benefit Analysis
- A Plan To Maximize Utility Incentives
- Turn-key Labor, Material, & Disposal

Mechanical & Power Services
- Operational Assessments
- Pumps & Fans
- Motors & Drives
- HVAC Systems
- Boiler Systems
- VFDs & NEMA Premium Motors
- AHU Upgrades
- RTU Efficiency Upgrade Systems
- EMS / BMS
- Energy Engineering Consulting Services
- Energy Audits of Buildings
- Energy Conservation Solutions
- On-site Services

Markets Served
- Commercial
- Industrial
- Municipal
- Small Business
- Education
