

WHEN MANUFACTURING ASSETS FAIL

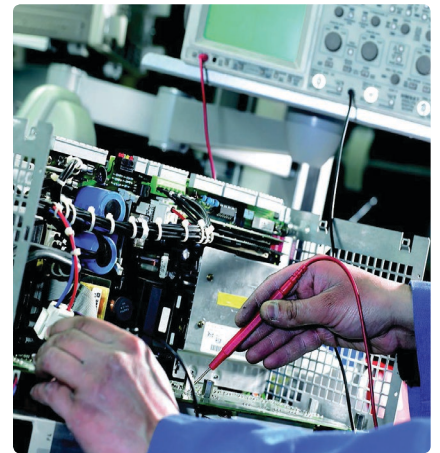

Our repair and remanufacturing services keep you up and running.

We repair over 7,000 brands of industrial electronics. Restore your equipment to its original operating condition.

Just fixing the problem that caused your part to malfunction isn't always enough to guarantee its proper operation.

Repair services include:

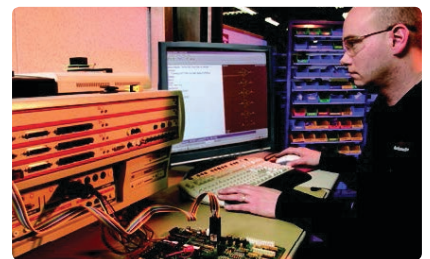

- Thorough cleaning of incoming products
- Diagnostic tests to locate defective components
- Circuit analysis to isolate marginal components
- Defective and marginal components replaced
- Verification of repair using state-of-the-art test equipment
- Ships in safe, static-free packaging
- Two-month warranty

Our remanufacturing services include a comprehensive process to restore your Allen-Bradley® and Reliance Electric equipment to its original operating condition.

Remanufacturing services includes all the repair services above plus:

- Immediate exchange parts available
- Latest firmware installed
- Remanufactured product is in like-new condition
- Accessories (keys, manuals, batteries, etc) are included when the product is returned
- Parts ship fast (we stock most exchange parts)
- Up to 24-month warranty is available

What do you have to lose except unnecessary downtime? Contact us today at (877) 390-8511.
